

**AUTOMATION CONTROLS
& INTEGRATIONS**

Innovative Solutions For Complex Facilities Challenges

Precision Controls of Indianapolis provides single-source solutions that meet a wide variety of facility design, installation, operation, and maintenance requirements. For more than 60 years, Precision Controls of Indianapolis team of facility experts has learned to anticipate operational needs, identify new technology trends, and provide building automation systems and services.

Precision Controls of Indianapolis automation group can help.

We combine advanced systems expertise and a sound understanding of today's facilities' requirements with extensive experience in providing our clients with tightly integrated, centralized operational control. We can even subdivide your building into virtually any number of individual zones, each of which can be monitored to keep performance sequenced appropriately within the most exacting tolerances. The result is facilities that deliver consistently optimal operation, reduced energy consumption and lower overall costs.

Our technical staff is second to none

From our LEED Accredited Professionals, Certified Energy Managers and Professional Engineers who can design your system requirements, to our factory-certified automation technicians — we provide the highest level of project delivery. We also provide on-going maintenance programs and technical support for all of your automation needs. Put it all together, and you have a package of superior services that can make a significant difference in your facility's comfort, productivity and energy efficiency.
