

# Precision Controls

of Indianapolis

An EMCOR Company

## INNOVATIVE SYSTEMS INTEGRATION

*Focused on Exceptional Performance*

**Precision Controls of Indianapolis (Precision Controls)** delivers facility automation design, installation, and support for every imaginable building system, in addition to web-based technologies, to give owners global access to all building performance information.

The Precision Controls team of experts provides unique solutions for a range of control and service challenges, including the application

of Programmable Logic Controllers (PLCs), Graphical User Interface (GUI) software, and Supervisory Control and Data Acquisition (SCADA) systems for a variety of markets. They can also repair, replace, and provide preventive maintenance and service for all types of heating, ventilating, and air conditioning equipment.
